Name _____ **Date** _____

Language worksheet 1

Vocabulary building

1 Draw a line to match each word with its meaning. The first one has been done for you.

Word	Meaning
Skeleton	the bones in your chest
Bones	the bones in your back
Skull	the bone that joins your leg to the upper part of your body
Rib cage	the hard, strong frame that supports our body
Spine	the bone that moves when we eat or talk
Hip	hard parts that form the skeleton
Jaw	the bones of the head

2 Write the correct word for each of these descriptions.

a Something that gives support and shape from the inside.

Frame

b An object or drawing that helps us understand how something works, or what something looks like, that we can't see in real life.

Model

c Animals with no backbone.

Invertebrate

d Parts of the body joined to the bones that allow you to move.

Muscles

e Substances that make our water, air and land dirty.

Pollutants

3 Write one word for each of the underlined parts in the following sentences.

a The job or use of the ribs is to keep safe the heart and lungs.

Function

Protect

b The heart and lungs are parts inside the body that do different jobs.

Organs

c Muscles always work in groups of two. When one muscle gets shorter, the other muscle gets longer.

Pairs

Contracts

Relaxes

d A crab has a hard covering on the outside of the body.

Exoskeleton

e When we are ill, we take drugs that make our bodies better. They can also stop us from getting ill.

Medicine

Prevent

Language worksheet 2

Skills development

1 Vertebrates and invertebrates are different.

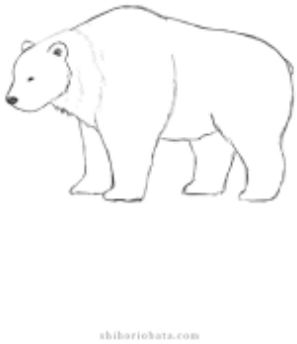
a In Box 1, draw a picture of an animal that is a vertebrate.

Write the name of the type of animal in the space underneath its picture.

b In Box 2, draw a picture of an animal that is an invertebrate.

Write the name of the type of animal in the space underneath its picture.

Box 1	Box 2
	



c Finish these sentences
